

Why do I want internship?

I am eager to secure this internship because my journey into the realm of natural language processing (NLP) began when I was tasked with presenting a seminar on the subject. This initial exposure sparked a deep curiosity within me, leading me to delve further into NLP during the hackathon where I had the opportunity to explore large language models (LLMs).

Working with LLMs during the hackathon was a truly rewarding experience. It not only solidified my passion for NLP but also revealed my aptitude for handling complex language models. I find immense joy in coding, and this internship presents the perfect avenue for me to combine my passion for programming with my growing expertise in LLMs.

Looking ahead, I envision myself making significant strides within your company. Within the next 1-2 years, I am eager to immerse myself in the intricacies of LLMs, gaining hands-on experience and contributing meaningfully to your projects. Over the course of 5 years, I aspire to evolve into an expert in the field, leveraging my skills to take on challenging roles and drive innovation within your organization.

I'm sorry to tell you that I was not able to do this task well due to less time and some other issues but I promise I can complete the works on time.

Thank you
