Hardpoint Consulting

Subject: Letter to apply for Internship at Hardpoint Consulting

Dear Sir

I would love to do an internship with Hardpoint Consulting because I consider the company's work with LLMs to help SMEs admirable as it can make a real difference in the world. My passion lies in Generative AI and Natural Language Processing, and this internship perfectly aligns with those interests.

I've been actively learning about these fields through courses and projects, like building an AI chatbot for interview practice. This project helped me sharpen my NLP skills and even gave me experience with user interface design. The Hackathon further helped me delve into new technologies and broaden my knowledge.

In a year, I see myself diving into projects that utilize cutting-edge technologies, all while learning from experienced professionals in the field. In three years, I aim to leverage the industry experience I gain to become more confident in tackling socially relevant projects. By year five, I hope to be actively contributing to impactful initiatives and bringing my own innovative ideas to the table. Throughout this journey, I wish to remain a continuous learner, making use of the new innovative technologies being developed every day.

Thank you for the opportunity

Yours Sincerely

Neeraja Krishnakumar
